The Outdoor

# SOLAR SHOWER

Home Heating Products introduces a collection of energy wise "Solar Showers".

Solar Showers lets you enjoy a warm shower outdoors without costly plumbing installation and energy charges.

Model: SS-N

Convient Garden Hose Connection

## Features:

- One piece chrome hot/cold mixing valve
  - The internal Solar Pipe, the support and all accessories are made of quality AISI 316L stainless steel
  - The round design of the Solar Tower allows the sun's energy to be absorbed from all directions.
  - The sun heats the water through the clear Methacrylate outer tube utilizing the greenhouse effect. Methacrylate is the same durable material used for aircraft windows. This outer tubing is UV stable and will remain clear optimizing solar efficiency and ensuring a long dependable life. The rubber seals are specifically engineered for outdoor use.
- \* On sunny days, the solar shower can deliver up to 55 gallons of hot water, even with frequent use. Single use can use up to 8 gallons of hot water before the unit recharges.
